SUMMARY

Data-driven HR Analytics and MIS professional with over 3.5 years of progressive experience across tier-1 consulting and IT services ecosystems (EY GDS & TCS). Specialized in manpower analytics, advanced Excel/VBA automation, and data quality governance. Adept at transforming complex workforce datasets into automated dashboards, executive storylines, and predictive attrition insights for senior leadership. Combines a strong foundational background in business operations with an MBA to bridge the gap between human capital metrics and strategic business outcomes.

Professional Experience

Associate Resource Manager – Workforce Analytics & Operations, November 2025 – Present
EY(GDS) – Bengaluru, KA,India.

- Collaborate with business unit heads and service line leads to analyze talent supply and demand pipelines, ensuring optimal resource utilization.
- Evaluate bench strength and map technical skill profiles to project requirements, pitching deployable internal talent to meet critical business demands.
- Conduct structured cadence meetings with delivery leads to track the onboarding status and performance metrics of proposed resources.
- Spearhead the adoption of a newly implemented enterprise resource management platform, acting as the team's subject matter expert (SME) to train peers on system workflows and enforce data governance standards.
- Leveraged Microsoft Copilot to architect custom VBA macros and advanced MIS templates, transforming complex, manual weekly matrix data views into streamlined, automated tracking files.
- Engineered custom data extraction methodologies and built 3 distinct executive reporting templates—covering pipeline demand, real-time booking statuses, and overbooking risks—to optimize operational and capacity projections.
- Eliminated manual data processing bottlenecks for the wider team by deploying automated macros across demand and overbooking workflows, significantly reducing reporting turn-around time.
- Identified technical system gaps, documented internal shortcuts to boost team productivity, and delivered critical feature enhancement recommendations to platform developers.

Associate Resource Manager – HR MIS & Operations, August 2022 – November 2025
Tata Consultancy Services – Chennai, TN,India.

- Managed end-to-end manpower forecasting and resource deployment schedules for large-scale departments to align with strict project timelines.
- Resolved critical resource allocation conflicts and minimized project dependencies by initiating rapid internal talent reallocations to meet shifting client deliverables.
- Monitored regional bench strength and capacity metrics to facilitate internal movements, successfully reducing unallocated resource lag time.
- Generated regular operational dashboards and staffing forecast reports for senior leadership to drive data-backed human capital decisions.
- Supervised and mentored junior team members, establishing standard operating procedures for resource tracking and data management.
- Drove internal process improvement initiatives, digitizing manual tracking workflows to maximize data accuracy across the HRMS portal.
